

CB MAINTENANCE IN ZOOTECHNICAL FARMS

G. DONCA, I. MIHĂILĂ

Abstract

Maintenance has been an important factor in modern company's competitiveness and lately has been attracting more attention. The objective of maintenance is to reduce the number of unexpected breakdowns due to failures, which may be catastrophic and may cause huge loss or animal death. Many companies have shifted their maintenance programs to condition-based maintenance (CBM), which, if correctly and effectively implemented, can significantly reduce the maintenance cost by cutting down the number of unnecessary scheduled preventive maintenance operations.
