

POTENTIALUL TURISTIC SI AGROTURISTIC AL JUDETULUI BIHOR

BIHOR COUNTY TOURIST AND AGRO TOURIST POTENTIAL

Maria Ruge

Abstract

The relief of Bihor County is characterized by a great variety of landscape generated by various forms of relief by mountain and hilly peaks that alternate with depressions and valley corridors that are completed with different components of vegetation, fauna and waters.

Not all the massifs from the mountains in Bihor County territory have a special agro tourist potential, fact seen in the distribution of the tourist and agro tourist guest houses. The biggest number of guest houses is located in Bihor Mountains and Padurea Craiului Mountains. Codru Moma Mountains and Plopişului Mountains have a poor agro tourist potential.
