Abstract

This paper examines the development potential of tourism and more precisely of rural tourism in Bihor county. In that direction we realized a SWOT analysis meaning that we have presented here strengths in rural tourism from Bihor county and weaknesses as intern environment characteristics; on the other side we have marked out the opportunities and the threats of the extern environment for the Bihor’s rural tourism. Pointing out the results of the analysis we can affirm that, though some parts of the Bihor’s rural tourism segments are dealing with a series of problems, still the main conclusion of the study is that Bihor county has a remarkable potential in developing its rural tourism.

Key words: rural tourism, Bihor county, strengths, weaknesses, opportunities and threats.

INTRODUCTION

The capacity of a certain community to use its potential is easily perceptible through its direct and indirect effects. Any community has a potential that is fixed for, it is only a matter of whether or if they know how to use it.

Bihor county presents a multiple and various gamut of touristic resources and attractions, which are generally bounded by the natural environment, by Bihor’s cultural and historical heritage, by the constructed patrimony and the specific infrastructure.

Bihor county has some national interests resorts such as Baile Felix, Tinca, Baile 1 mai and Stana de Vale. The especially natural patrimony is marked by the presence of a great forestry and by a great number of caves that have national and international value.
In Bihor we can distinguish some ethno-folkloric subzones delimited by the valleys of some mainstreams such as: Black River, Fast River, Barcaul and Ierul. The traditional handicrafts contribute to the customization of the ethnographic zones. Once they have contributed at the consecration of a complementary economy which brought an additional income for a lot of rural community from Bihor.

Bihor county is well known for its beautiful fairs, festivals and its specific musical folklor.

This unprecedented combination between nature, natural patrimony and an important cultural heritage, respectively geographic and ethnographic variety, offers Bihor county the chance of developing as an important rural touristic destination from Romania’s N-W zone.

MATERIAL AND METHODS

In this paper we realized a SWOT analysis meaning that we have presented here strengths in rural tourism from Bihor county and weaknesses as intern environment characteristics; on the other side we have marked out the opportunities and the threats of the extern environment for the Bihor’s rural tourism.

SWOT analysis is a technic used to settle the position of the rural tourism and agrotourism from Bihor county, for example, on the national and international market, as well as for settling the actions that must be undertaken in order to maintain and to increase the competitiveness. This analysis represents a method of audit for the organization and for its environment, being considered a first step for a strategical planning. The method helps the specialists to concentrate on the most important aspects, and once they are identified these are transforming into marketing objectives.
RESULTS AND DISCUSSIONS

**Specific Infrastructure:**

- Accommodation spaces of 3,4 flowers in all the county (Baile Felix, Remeti, Stana de Vale, Boga, Baile 1 Mai, Vartop)
- A good no. of touristic agencies and tour-operators who work in Bihor county

**Legislation:**

- A legislation from touristic domain harmonized with the EU legislation

**Others:**

- The existence of some various projects of ecological tourism and of environment protection (made by decentralized authorities and by various environment ONG)
- Valuable human resources for tourism in many communities from the county

**Specific and Connected Infrastructure:**

- Badly maintained touristic routes, unadapted to the European ones.
- Too few youth hostels and rural boarding houses in the mountain area
- Too few accommodation spaces in this areas
- In some rural zones there are very bad kept accommodation spaces
- Wrong development without some planning action and environment counsels
- A low developed infrastructure regarding the extreme sports, water sports
- The lowest grade of having a telephone (2.88 tel at 100 residents)
- Very little usage of the methan gas for warming and other purposes.
- Slight no. of the localities where the gas is distributed
- Unappropriated storage and the lack of recycling the waste products

**Promotion:**

- A bad promotion of the touristic
| Potential of the county | • A partial promotion of the touristic destination with an out of date instrumentality (deficient use of the internet)  
• The lack of some touristic informing points and offices in the county  
• Unsufficient qualified personal (especially confirmed touristic guides, connoisseur of foreign languages)  
• The lack of some training and development centres for human resources in tourism and territorial planning domain  
• The lack of some norms to apply the 5/2000 Law regarding the protected areas  
• The uncorrelation of the efforts between decentralized authorities and the political factors, with discretion at central level, regarding the promotion of some utile projects in the county  
• Unsufficient initiative for the promotion of the development of the infrastructure  
• The microclimate of some touristic zone can negatively affect the visitors (Padis, Beius)  
• The lack of some participatory local plans for integrated touristic development  
• The lack of relevant statistical data |

good, low unemployment

- The introduction of methan gas in the county
- The institution of Apuseni Mountains Natural Park
- The existence of some touristic associations and ONG in the county (ANTREC, The River Country, Rivers Valey Natural Park)

human being on the nature

- An opening of a mining plant of gold in Apuseni Mountains (Rosia Montana)
- The youth lack of interest regarding the keeping of popular traditions and handicrafts and of the local culture

CONCLUSIONS

SWOT analysis reflects the “delicated” situation which characterize Bihor county nowadays. There are a lot of negative aspects which rural tourism from Bihor must deal with but in spite of these ones we have here in Bihor a lot of positive aspects too.

The rural tourism from this county has a valuable and varieted natural potential, but is polluted in some areas because of the bad implementation of the environment lows in the county, and though the county has a great cultural patrimony it is dealing on the other side with a lot of degrated buildings and historical monuments.

Bihor county is dealing as well with some infrastructure problems such as bad driveways, the lack of a highway a bad communication network all of these limiting the access of potential tourist in some attractive zones.

Talking about human resource we have a lot of hospitable people in the county but they must realize that they are unsufficient trained and too little employed in tourist units.
Bihor county has a great potential to develop as a rural touristic destination, but it must increase its own level of marketing by inlarging the promotion image.
