CONCLUSIONS

MDRT recently developed a software application called "SIET - Integrated Record Tourists" which includes information on tourism accommodation with accommodation functions, classified and recorded in real time tourists staying in tourist accommodation establishments.

Application will be managed and audited by the Special Telecommunications Service requires operators, owners and managers of
tourism accommodation facilities to tourists arriving safe filling in the "sheet announcing the arrival and departure of tourists". These sheets filled with tourists are taken by receptionists IDs that are required to check and sign them to conform.

Administrators of accommodation will be required to register Siete tourists accommodated in the system.

In the explanatory memorandum to the draft law states that the system will create a positive impact "in the sense that it will reduce tax evasion by recording real-time tourists".

Currently working on linking enactment of laws relating to privacy, that is processing personal data.
